## **Purpose**

Romania-Active is committed to sustainable practices. The purpose of this policy is to ensure all stakeholders involved (our team, guesthouses, guides, partner agencies, transportation companies, even guests themselves), set environmental and social standards by implementing and agreeing upon clear standardized sustainability requirements within their own business.

### Sustainability commitment

Our sustainability performance is highly important to us, especially because we are an ecotouristic organization committed to sustainable practice, and we encourage all our partners to adhere to this practice as well in order to create safer, more environmentally-friendly, and more pleasurable travel.

We will use the Travelife platform to report on our progress and will be very transparent with this report. We are committed to openly communicate with the public about our performance by means of the Travelife report every 2 years.

We comply with all applicable legal requirements and work to prevent incidents or conditions that might result in a violation of law.

For any complaints, we encourage our clients to contact us directly via email or telephone to explain the incident and from there we will take measures to resolve the issue within a maximum of 2 days. We also instruct all our suppliers on how to behave and communicate with the clients and how to help them solve issues on the ground in the case of any complaints that may arise. All stakeholders - employees, transportation companies, guides, guesthouses, partner agencies, and clients, are free to make an anonymous report about any occurrence via e-email or telephone. We strongly encourage everyone we work with to do this.

## **Accommodations**

Preference is given to accommodations that are AER-certified (national certification), or internationally certified, however, since most accommodations are still in the process of becoming certified and only recently made aware of the importance of this, we secondly also choose accommodations that are self-evaluated, or evaluated by a second-party, and those that are known to meet our most important sustainability requirements.

- In the accommodation selection process, Romania-Active considers the sustainability practices of accommodation by taking into account their sustainability management and social and environmental footprint - what they do with their food waste, whether they recycle, how they restrict energy consumption, where they get the ingredients that they cook with.
- Romania-Active favours the selection of accommodations that respect and protect the land, and respect local culture, traditions and architecture.
- Most of our accommodations are small-sized guest houses owned and run by local people, with whom we have developed a very close relationship.

- We always promote local guides with knowledge of the region
- All our boat tours in the delta are in line with the sustainability criteria as established by the Danube Delta Reservation Association - boats do not go too close to the pelicans and other birds, do not turn the engine on in the highly protected channels.
